

**RAVEN IMAGE, INC.**

**ART MEMORIES:**

Raven Image reproduces your photos to look like a traditional oil painting. Using a stylus, tablet, and Corel Painter X, we use brushstrokes and our own artistic touch to give your photos a painterly feel. We do NOT run a Photoshop filter. All of our ArtMemories canvases are printed, stretched, and coated with the same material as our Fine Art Giclée.

**ROLLED CANVAS:**

Rolled canvas is the right choice if you intend to stretch the canvas yourself or have plans to create something completely different with your print. We will print your canvas to specification and then trim, leaving 2" of workable un-inked space around the image.

**STANDARD STRETCH:**

Standard stretch is the perfect choice anytime you plan to enhance your canvas print with a traditional frame.

**GALLERY WRAP:**

Gallery Wrap is the most popular choice for canvas stretching. Perhaps because it offers a clean look. Ready to hang, no frame needed. The print area of a gallery wrapped canvas extends beyond the main image dimensions, so that it can stretch over the sides of the frame.
